Safer Internet Day 2024

On Safer Internet Day, we focused on how to stay safe online! We held an assembly where we talked about the parts of the internet that make us feel happy and secure, as well as those that can make us feel sad. We emphasised the importance of reaching out to trusted adults if we ever need help with anything online.

Each year the group participated in fun activities related to online safety. We explored which apps are safe to use, discussed fake news, learned about photoshopping, and practiced using our devices responsibly. The students created wonderful work and shared their ideas on how to stay safe online.
