UKS2 Team

Year 5 & Year 6 Space Dome Experience

As UKS2 came to an end of 'Journey to Space', they had an exciting day for their 'Fabulous Finish'. They stepped into the world of space through an immersive experience. The children excitedly entered the dome throughout the day to watch a variety of different space shows linked to their learning. Each show was tailored to different lessons they have covered in class and their learning from their school trip to the Science Museum.

When they entered the dome, they were able to ask and answer questions all about their learning. During their experience, they learnt all about how the earth orbits the sun in space and the relevance to day and night. The children also discussed the planets and their distance from the sun, as well as described the movement of the moon relative to the Earth.
